EMULATION TECHNOLOGY ANNOUNCES NEW OPEN-TOP QFN/MLF PROGRAMMING ADAPTERS

Adapters' top-loading design provides easy programming solution

SANTA CLARA, Calif., October 26, 2004 - Emulation Technology, Inc. (ET), today announced the expansion of its broad line of QFN/MLF device programming adapters with the introduction of its new Open-Top QFN/MLF Programming Adapters. The adapters currently are available in body sizes 3X3mm to 15X15mm, pin counts from 8-pin to 84-pin, and lead pitches of 0.50mm, 0.65mm, 0.80mm, 1.27mm.

POPULAR PACKAGE

Many designers are aware of the space constraints, as well as heat and power limitations associated with new designs. Meeting these requirements is one reason the QFN/MLF package is often chosen. It is smaller and thinner than other similar leaded packages; it has a lead-frame on the bottom of the package, provides excellent thermal performance, and minimal self-inductance.

FEATURES & BENEFITS

- The top-loading, burn-in socket design provides an easy programming adapter solution.
- Its space-saving small outline accommodates engineers' programming needs and eliminates the necessity to create a cumbersome workaround.
- The wire wrap posts on the bottom of the adapter provide users with additional functionality.

EXTRA FEATURES & BENEFITS

- The adapter serves multiple roles for design engineers as the signal mapping enables it to be used for QFN/MLF prototyping, quality and reliability testing for this increasingly popular chip package.

Pricing and Availability:

Pricing for the QFN/MLF Programming Adapter, part number AS-28-28-02ML-6-OT, starts at \$193.00 each. Delivery is stock to 5 days.

About Emulation Technology

Founded in 1983, Emulation Technology is the industry leader in interconnects solutions. Emulation Technology has more than 50,000 customers and operations in 23 countries worldwide, selling directly through its extensive catalog, distributors and online store at WWW.1800ADAPTER.com, or by calling 1-800-ADAPTER (232-7837). The company is privately held and is headquartered at 2344 Walsh Avenue, Bldg. F, Santa Clara, Calif., 95051
